RESTRICTION

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-11, drawn to a sawtooth generating circuit, classified in class 327, subclass 131.

II. Claims 12-14, drawn to a current generating circuit, classified in Class 327, subclass 538.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different Groups I, II and III are unrelated because the Group I relates to the sawtooth generating circuit while the Group II relates to current generating circuit. Thus, these inventions are unrelated.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
